Langara College — 2024-present
Post-Degree in Web & Mobile Design & Development
★ 2x Dean's Honour Roll

Campina Grande Federal University — 2018-2023
Bachelor of Computer Science

WORK EXPERIENCE

Wipro (Recife, Brazil) — 2023
Junior Web Developer

As a full-stack web developer with .NET, I worked on web control systems for the Transit Department of the State of Pernambuco, Brazil. These apps were used both internally by the department officers and by the general public consisting of millions of drivers for booking services, registering and controlling vehicles, and generating reports.

Key responsabilities:
- Full-stack development with .NET
- Basic database management with MySQL
- Meeting deadlines following the SCRUM methodology
- Versioning with TortoiseSVN

Millennium IE (Campina Grande, Brazil) — 2021
Full-stack Web Development Intern

This small local company has many web applications that are either for internal control or for client's consultation. More specifically, these systems allowed CRUD operations for the employees to control the company's sales and for the clients to track their parcels. I was responsible for the entire process of development, from UX/UI designing to developing new functionalities, testing, deploying, and managing them. I even automated some tiring tasks with a command line robot written in Java!

Key responsabilities:
- Full-stack development with Java (JSP) & Primefaces
- Database management with Oracle SQL
- UX/UI Design
