2018-2023

Langara College

Vancouver - BC, Canada

Post-Degree in Web & Mobile App Design & Development

★ 3x Dean's Honour Roll

2024-2025

WORK EXPERIENCE

Millennium IE

Campina Grande - PB, Brazil

Full-stack Web Development Intern

This small local company has many web applications that are either for internal control or for the general public, and I was responsible for developing new functionalities, designing, maintaining, testing and deploying them. I even automated some tiring tasks with a command line robot written in Java!

Key responsibilities:

- ◆ Full-stack development with Java (JSP)
- ◆ Database management with Oracle SQL
- ◆ UX/UI Design
- ◆ Software engineering

Wipro

Recife - PE, Brazil

Junior Full-Stack Web Developer

As a .NET developer with, I worked on web-based control systems for the Transit Department of the State of Pernambuco, Brazil. These apps were used both internally by the department officers and by the general public for booking services, registering and controlling vehicles, and generating reports.

Key responsibilities:

- ◆ Full-stack development with .NET
- ◆ Basic database management with MySQL
- ◆ Meeting deadlines following SCRUM
- ◆ Versioning with TortoiseSVN

2023

Langara College

Vancouver - BC, Canada

Full-Stack Web Developer

During my last term in Langara College, I got the part-time position of full-stack developer at the Fine Arts department. The system I was responsible for was a headless CMS built with Next.js and Wordpress that serves as a platform for graduates of the Fine Arts program to publish their work.

Key responsibilities:

- ◆ Headless CMS development with Next.js
- ◆ Direct communication with clients
- ◆ Versioning with Git
